SARTIQ NEURAL WAVE · TEST GARMENTS G01–G15

Flat-Lay Capture Protocol

How to photograph each garment so the pipeline has to change as little as possible. Follow it top to bottom: set up the phone once, set up the space once, then repeat sections 4–7 for every garment. About 3–4 minutes per garment.

1 · iPhone setup | 2 · Space & light | 3 · Garment list | 4 · Styling templates | 5 · Position & exposure | 6 · Shot list | 7 · Check & transfer

1 iPhone 17 Pro setup (once)

Menu names can differ slightly between iOS versions. Look for the closest match.

In the Settings app → Camera

1. `Formats` → `ProRAW & Resolution Control` **ON**, then `Pro Default` → **ProRAW 12 MP**. RAW lets us fix white balance later in code, so the phone's auto white balance stops mattering.
2. `Grid` **ON** and `Level` **ON**. Pointing straight down, a crosshair appears.
3. `Preserve Settings` → `Creative Controls`, `Exposure Adjustment`, `Macro Control` all **ON**, so nothing resets between shots.
4. `Photographic Styles` → **Standard**, with no tone or warmth changes.
5. `Macro Control` **ON**. This shows the macro toggle so it can be kept off.

In the Camera app (Photo mode)

1. **RAW** badge visible and not crossed out (top of the screen).
2. Flash **OFF**, Live Photo **OFF**, Night mode (moon) **OFF**, macro **OFF**.
3. Lens: **2×** for tops, shorts and anything up to ~70 cm. **1×** for the long dress and trousers. **Never 0.5×**, which bends straight lines.
4. Timer **3 s**, so pressing the shutter does not shake the phone.

If RAW files are a problem to transfer, use `Formats → Most Compatible` (JPEG) instead. Tell the pipeline team which one you used.

2 Space and light (once)

- [ ] **One kind of light only.** Either daylight (lamps off) or room lights (curtains closed). Never mixed, never a sun patch.
- [ ] **Soft and even.** Ceiling light or a big window, not one lamp next to the garment. No flash.
- [ ] **No shadow from you.** Stand on the side away from the light and lean in only as far as needed.
- [ ] **Same spot, same light, for every garment.** Mark the corners of the shooting area with tape.
- [ ] **Background: flat, matte, plain, bigger than the garment.** Board, paper, a tight sheet or a smooth floor. **Not a bed.**
- [ ] **Contrast:** dark garments on light grey or white. Light garments (white, cream, light grey, light denim) on a **mid grey or darker** surface.
- [ ] **Nothing else in frame:** no hanger, clip, phone, feet, other clothes or the ID tag.

3 The 15 garments

Shoot the `priority` ones first if time is short; they cover every hard case. Exposure is the starting point for the slider in section 5.

ID	GARMENT	TEMPLATE	BACKGROUND	EXPOSURE	WATCH OUT
g03 `priority`	Black rib-knit sleeveless vest	Sleeveless	Light	+0.3 to +0.7	Rib texture must be visible
g14 `priority`	Black zip mock-neck jacket	Long sleeve	Light	+0.3 to +0.7	Zip fully closed, collar neat
g09 `priority`	White oversized tee, small grey chest logo	T-shirt	Mid grey	−0.3 to −0.7	White must keep texture; logo sharp
g15 `priority`	Light bleached denim trucker jacket	Long sleeve	Mid grey	−0.3	All buttons closed, pocket flaps down
g05 `priority`	Olive tee with large black bandana print (front)	T-shirt	Light	0	Close-up of the whole print

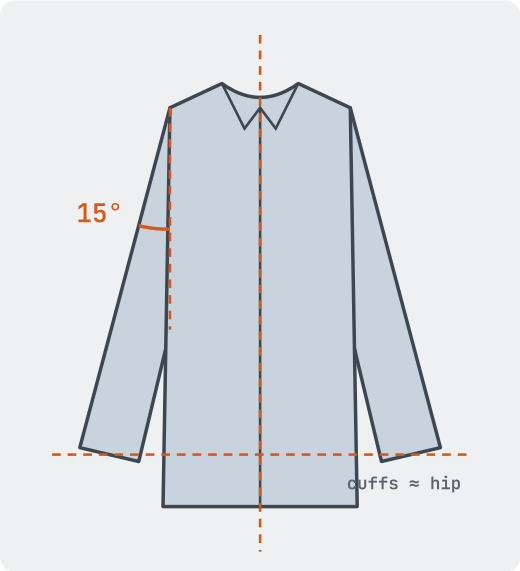

ID	GARMENT	TEMPLATE	BACKGROUND	EXPOSURE	WATCH OUT
g11 priority	Teal adidas V-neck sweat, cream 3-stripes	Long sleeve	Light	0	Stripes straight, logo close-up
g07 priority	Burgundy maxi slip dress, thin straps	Dress	Light	+0.3	Straps straight up and visible; shoot at 1×
g01 priority	Olive cotton shirt, button-down collar	Long sleeve	Light	0	Collar buttons and front closed
g02	Very dark brown cap-sleeve top	T-shirt	Light	+0.3 to +0.7	Side ruching visible
g04	Grey-black stone-wash denim western shirt	Long sleeve	Light	+0.3	Wash texture close-up; red tab
g06	Taupe sleeveless top, uneven hem	Sleeveless	Mid grey	0	Keep the asymmetric hem as it is
g08	Black high-waist pleated shorts	Shorts	Light	+0.3 to +0.7	Pleats aligned, closed at the waist
g10	Black barrel-leg trousers	Trousers	Light	+0.3 to +0.7	Full length, shoot at 1×
g12	Light heather grey sweat; text front, big print on back	Long sleeve	Mid grey	−0.3	Front text close-up; back shot separately
g13	Mid-grey cropped cardigan, 3 tie bows	Long sleeve	Light	0	Tie all 3 bows neatly

4 Styling templates

Seen from above, front side up. The dashed orange line is the centre axis: it must be vertical and the garment must mirror across it. Sleeve angles follow the train targets; adjust if Sartiq tells us their convention tomorrow.

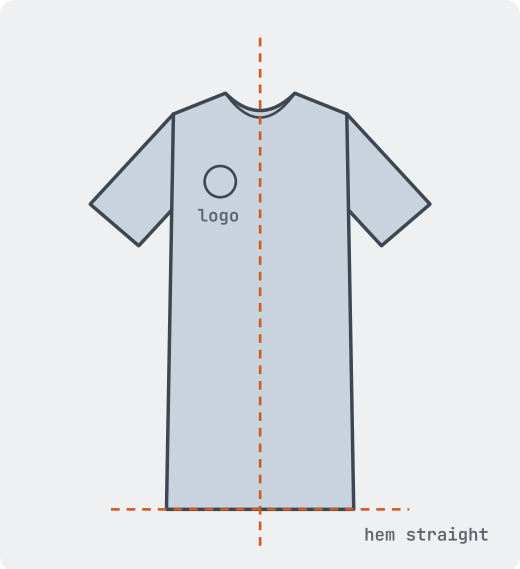

For every garment

Smooth from the centre outwards with flat hands. Gently pull hems and cuffs straight. Close every button, zip and snap. Tuck the ID tag inside and put it back afterwards. Remove lint and hairs from dark fabric.

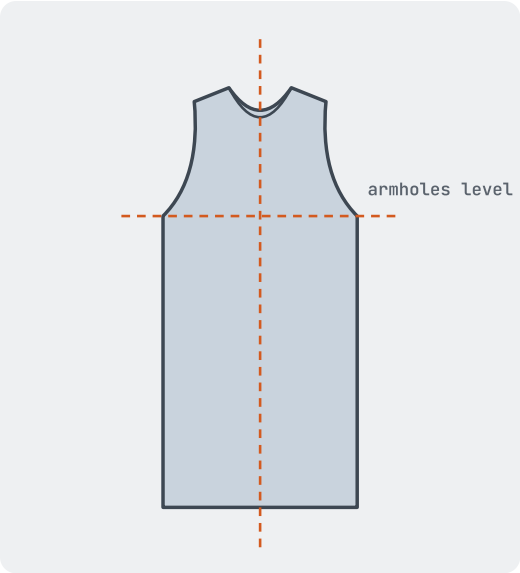

g01 · g04 · g11 · g12 · g13 · g14 · g15

- [ ] **Sleeves down, about 15° out from the body**, the same on both sides. Not straight out, not folded under or across the body.
- [ ] **Cuffs at about hip height**, level with each other, cuff edges straight.
- [ ] **Shoulders level**, body straight down, hem horizontal.
- [ ] **All buttons and zips closed**, collar flat and symmetric (g01 collar buttons too). Pocket flaps down.
- [ ] g13: tie all three bows the same way. g14: mock neck folded neatly or standing evenly.

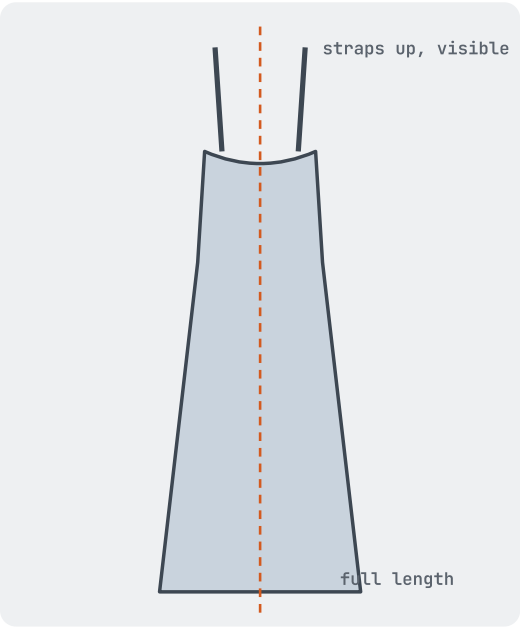

g02 · g05 · g09

- [ ] **Short sleeves lie flat at their natural angle**, both sleeves the same angle and length. Do not fold them under.
- [ ] **Neckline round and centred**, no twist in the collar rib.
- [ ] **Hem straight and horizontal**; smooth the side seams so they run straight down.
- [ ] Print and logo flat with no wrinkle running through them (g05 print, g09 chest logo).

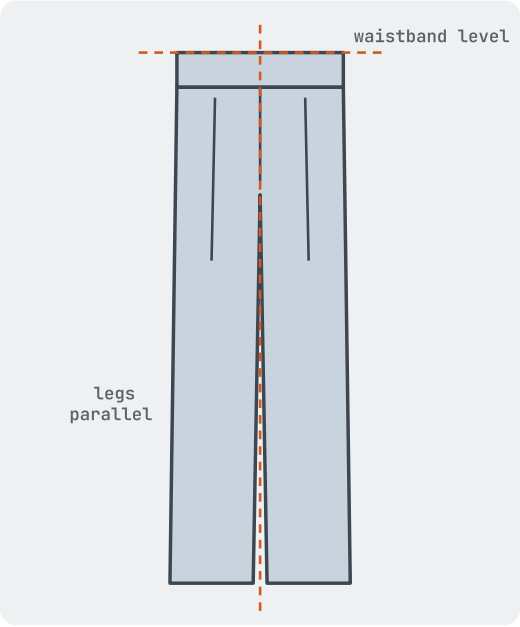

g03 · g06

- [ ] **Shoulder straps and armholes symmetric**, both armholes at the same height.
- [ ] **Body straight down**, side seams straight.
- [ ] g06: keep the uneven hem and side ruching the way the garment is made; don't force it straight.
- [ ] g03 is small: get closer (2×) so it fills most of the frame.

g07

- [ ] **Straps laid straight up**, parallel, sliders visible. Straps are thin, so they must not twist or disappear under the dress.
- [ ] **Full length, nothing folded**; hem flat and even, side seams straight.
- [ ] Shoot at **1×** from high enough to keep a margin above and below.

g10 trousers · g08 shorts

- [ ] **Waistband straight and horizontal** at the top, button and zip closed.
- [ ] **Legs parallel** (or very slightly apart), both the same length, **never folded or crossed**.
- [ ] Pleats and creases aligned straight down the legs.
- [ ] g10 is long: shoot at **1×**. g08 shorts: same layout, just shorter.

5 Camera position and exposure (every garment)

Position

1. Hold the phone **flat above the centre** of the garment, screen facing up.
2. Move it until the **two crosshairs overlap and turn yellow**: the phone is now level.
3. Garment fills **about 70–80% of the frame** with a clear margin on every side. Nothing touches the edge.
4. **Portrait orientation** for tops, dress and trousers. Top of the garment at the top of the frame.
5. Rough heights: **2× from about 1.2–1.5 m** (stand on a chair), **1× from about 0.6–1.1 m**.

Exposure

1. **Touch and hold on the garment** until `AE/AF LOCK` appears.
2. **Drag the sun icon** next to the focus box up or down, using the starting value from the table in section 3.
3. **Black garments:** fabric texture (ribs, weave) must be visible, not a flat black shape.
4. **White and light garments:** folds and texture still visible, no glowing flat white areas.
5. Press the shutter, keep still until the 3-second timer fires.

6 Shot list per garment

Example names for g05; replace the ID. Rename right after shooting or note the order.

Front, full garment

Styled as in section 4. Take 2.

`g05_front_1.jpg`
`g05_front_2.jpg`

Back, full garment

Turn it over, same styling and position.

`g05_back.jpg`

Close-ups

Print, logo, fabric texture, buttons, zip. 1–3 shots.

`g05_detail_1.jpg`

Empty background

Garment removed, same spot, same settings.

`g05_empty.jpg`

7 Check, then transfer

Before the next garment, zoom in and check

- [ ] Whole garment in frame, margin on all sides
- [ ] Sharp, not blurry
- [ ] No shadow from you or the phone on the garment
- [ ] Blacks show texture, whites show texture
- [ ] Buttons closed, tag hidden, nothing else in frame
- [ ] Garment straight and symmetric on the centre axis

Transfer to the laptop

- [ ] **AirDrop → Options → "All Photos Data"**, or a cable. This keeps the RAW file and its metadata.
- [ ] **Never WhatsApp or Telegram**; they compress the photos and strip the metadata.
- [ ] Put everything in one shared folder: `captures/night1/`
- [ ] Put the ID tag back on each garment when you're done.
